SIGNS & SYMPTOMS

Suspect alcohol poisoning if you notice several of the following signs and symptoms:

- Evidence of alcohol use (e.g., smell of alcohol, shot glasses, empty cans or bottles)
- Person has mental confusion (does not know the day, time, or presence)
- Person has excessive stupor (cannot stand without help, cannot walk without help)
- Person is vomiting
- **Person is having seizures**
- **Person cannot be roused**
- Person has very slow OR shallow breathing
- Person seems pale or has bluish skin color
- **The last four signs are VERY SERIOUS and require immediate medical attention – CALL 911 IMMEDIATELY!**
